

## Year 11 Transition work

### A-Level Biology

I would like you to download the 'Myton A level Biology Transition Pack', read through it and then complete the following tasks:

- Pre-knowledge topics and task pages 9-13 (minimum of two to be completed)
- Work through the modules from the Maths for Biology section (pages 14-15) and remember to log your progress
- Complete the **A level Biology Transition Baseline Assessment (to be handed in during your first Biology lesson in September)**

If you have any questions regarding the transition work then please e-mail me at [Stephenson.l@myton.co.uk](mailto:Stephenson.l@myton.co.uk).

For your interest CGP have created a book called 'Head Start to A -level Biology' which you may want to purchase, but it is not essential.

There are many activities within the transition booklet and hopefully some of these will spark your passion for Biology.

Have a great summer and see you in September!

Mrs Stephenson (Head of Biology)
