

Digital Games Production [DGP] Summer Work

I want you to make a short, 3 - 5 minute video about your favourite video game.

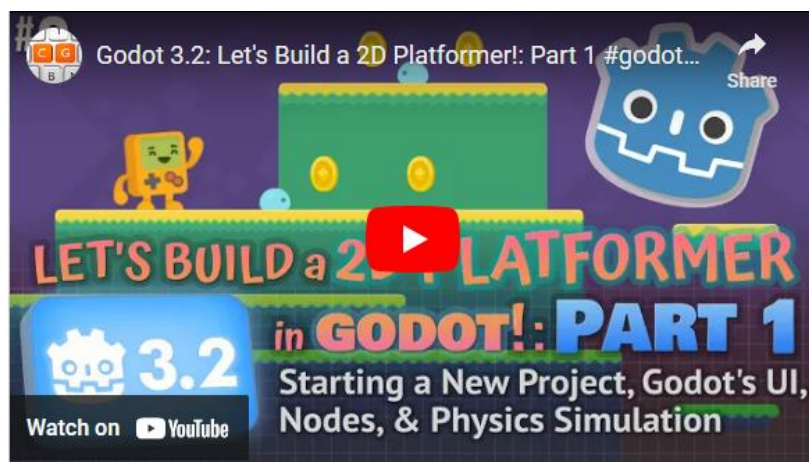

The video should include:

- Footage of the game
- Audio description of the game
- Justifying why this game is your favourite

Create an MP4 file; I'll have you email this to me on the first week.

I want you watch the two introductions to Godot and Blender:

[Godot 3.2: Let's Build a 2D Platformer!: Part 1 #godotengine](#)

[Let's Learn Blender! #1: Getting Started for Beginners!](#)

I want you to create a short presentation for a game that you would like to make one day.

The presentation should be 3-8 slides, and I should have a clear idea of what the game would be like based on this presentation. I'm being vague in what I'm asking for so I can see what you consider important in a plan.

If you'd like some more videos to watch, I recommend the following channels:

[GDQuest - YouTube](#)

[Grant Abbitt - YouTube](#)

[Game Maker's Toolkit - YouTube](#)

[Bramwell - YouTube](#)
