

Hello Year 5 and 6

We know that starting secondary school can be a big step.

This is a snapshot of what some pupils have been up to since they left primary school to come to Myton School as a Year 7.

From Myton School

FIND A FRIEND TO MAKE A FRIEND

Starting secondary school is a big thing, but it's also a magical thing where you will make lifelong friends.

You will make friends the moment you enter the front gate. Just start with one, then more will come – find a friend to make a friend.

Amy, Brookhurst Primary School

FOOTBALL TEAM IS GREAT FUN

I have joined the school football team for Year 7 and it's so much fun. We have matches home and away and even had a tournament.

Louie, All Saint's Junior School

THE FOOD IS AMAZING!

One enjoyable thing at Myton is the canteen and food! At breaktimes and lunch the canteen serves great pizza! Also at breaktimes, delicious pancakes and waffles are served. My personal favourite is definitely the pancakes!

Edyta, Shrubland Street Primary School

A CLUB FOR EVERYONE!

There is a club for everyone! If you're interested in sports there's a netball club, cross country club, football club and many more. But if you have other hobbies there is a chess club, card trading club and also music groups such as the choir vocal group.

We've got a ukulele club and you could also learn many other instruments such as piano, guitar, violin and many more!

Gurshaan, Sydenham Primary School

LOTS OF SCHOOL TRIPS!

You go on a lot of school trips whilst you're at Myton.

Recently I went on the Silverstone trip. We got to do loads of cool things like hold part of a famous driver's car.

You also get to sit in one of the first racing cars ever made!

Eric, Coten End Primary School

INTERESTING LESSONS

I like History because it teaches you all kinds of new things you didn't learn in primary school, like the Battle of Hastings and the Battle of Stamford Bridge.

I also like Science lessons where you can do all kinds of experiments. The one I enjoyed the most was watching my teacher test out elephant toothpaste!

Rony, Kingsway Community Primary School

TROPICAL STEEL PANS!

There is a big department just for music, and I am lucky enough to have music lessons on an instrument that I chose.

I chose the steel pans! I chose them because they sound nice and feel very tropical. I am really looking forward to my next lesson!

George, St Anthony's Catholic Primary School

I LOVE SCIENCE!

Science is my favourite subject because we get to do very fun practicals such as using bunsen burners and dissecting chicken wings.

There is also a lunchtime science club that is very cool because we get to dissect a lamb heart and experiment using alkalis and acids to explode containers.

Eloise, St Margaret's C of E Junior School

USING MY FINGERPRINT IS COOL!

When you first start at Myton you set up a fingerprint for the cafeteria. You will have an online account that your parents can top up so that you can buy food with your finger. How cool is that?!

Teddy, Coten End Primary School

ROBOT WARS!

I have joined the robot wars club. In it you get to design and 3D print a robot and at the end of the year you get to fight them in a tournament!

Oscar, Coten End Primary School

PE CLUBS ARE WOW!

The PE clubs here are WOW! I'm currently doing dance club and netball and I really enjoy these.

And if you are interested in music then you will be coming to the right place!

Adriel, Whitnash Primary School

A SENSE OF RESPONSIBILITY

At Myton you get the chance to be responsible for your own time and you have to make your way around the school. It gives you a sense of responsibility.

Ella, Coten End Primary School

HOCKEY AND CHESS CLUB ARE THE BEST!

You can attend clubs at lunchtimes. My favourite clubs are hockey and chess club. In my opinion they are the best clubs I've ever attended and something I never had the opportunity to do at my old school.

Rishi, Whitnash Primary School

NEW EXPERIENCES

Coming to secondary school can be a massive change, but once you know your way around you will be absolutely fine.

You'll make so many lifelong friendships, experience so many new things, go on loads of trips and I've got to admit, the food at Myton is amazing!

Sienna, Heathcote Primary School

DIFFERENT CLASSROOMS

At Myton there are specific classrooms for each subject and it's very cool. You get to do things like work with real machinery and create things using 3D printers in Design and Technology!

My favourite thing so far was designing my own lego keyring character!

Leon, All Saints' C of E Junior School

PORTACABINS ARE NICE

Some of you may know that Myton has been affected by RAAC which was used in buildings in the 60's and 70's and this means that some of the school has been shut off.

However, our Head Teacher has dealt with this incredibly by getting portacabins for lessons like Maths, Languages, Art, Drama, History and Music.

They are very nice and have everything you need for an amazing lesson.

Amelie, Whitnash Primary School

LESS SCARY THAN YOU THINK

I think Myton is awesome because the subjects you get to study are fascinating and the staff here are so smart and interesting!

If you are worried about going to secondary school, don't be. Going there can be less scary than the expectation.

Also, you have the opportunity to make friends along the way.

Iwinosa, Coten End Primary School

HELPFUL TEACHERS

One of the things I like best about Myton is that when I entered my classrooms for the first time I was welcomed by my teacher and made new friends very easily.

The teachers are not just people who teach you, they also help you if there is something going on other than schoolwork.

Aditi, St. Patrick's Catholic Primary School

NEW INTERESTS

Since starting in Year 7 I have gained lots of new interests like art and drama! I have learned to draw and create art with anything I have on me and drama has taught me confidence and new acting skills.

I promise you will shine in Year 7!

Corey, Woodloes Primary School

BRAND NEW SUBJECTS

You will get introduced to brand new subjects at secondary school. One of these is Life Skills where you get to learn key skills and health habits for your future.

Myton is an amazing school and you will have so much fun!

Amberley, Bishops Tachbrook C of E Primary School

NOTHING TO WORRY ABOUT

The teachers at Myton are very helpful and nice, they make the lessons more interesting than ever!

You might get lost in the first couple of days, but remember, there are lots of staff around and they can help you out.

One thing everyone worries about is homework, but it's not actually that scary and the teachers will help you. There is nothing to worry about!

Hing, Whitnash Primary School

We look forward to seeing you in September!
